

## THE POWERS VERTIGO TWPS HAS IMPROVED!

**This new version, the Vertigo TWPSN drills with ease into standard purlins up to 2.0mm and will also tackle lapped purlin joints.**

- **New Improved Pilot Point Drill Tip** - This allows the vertigo TWPSN to be installed in areas where the purlins join and overlap.
- **EPDM Washer** - for soft clamp effects eliminates risk of breaking from over tightening.
- **Standards Compliance** - Complies to standard AS/NZS2785-2000 clause 3.2.2(c) - individual ceiling hangers must have a minimum design tension load of 50kgs for non-trafficable ceiling systems (based on vertical installation). Use and suitability of the TWPSN hanger should be verified and approved by a design professional responsible for the particular project in question.
- **Complete System** - When used with the Ezy REACH pole tool (sold by Ezy Reach distributors - [www.ezyreachdistributors.com.au](http://www.ezyreachdistributors.com.au)) it's the perfect system for suspending ceilings, electrical lighting and air-conditioning ducts etc. The Ezy reach pole tool enables the TWPSN to be installed at heights of up to 8m in tight and awkward positions from the ground and without the use of scaffolds or scissor lifts.
- **New Part number** - From now on when ordering - the new part number is TWPSN (Ezi find 511).

**IN STOCK & AVAILABLE NOW**

for Steel <b>VERTIGO™ TIE WIRE HANGER</b>
