

Air Rivet Tools

R1-A1

The Pneumatic Riveter AR1-A1 - developed using the comprehensive technology of LOBSTER with the high quality and safety that's trusted by professionals around the world. Featuring best-in-class lightweight design. The main body and all associated parts are made in Japan.

- Rivet capacity sets standard rivets 2.4mm to 4.8mm in all materials. (Incl. Stainless)
- Lightweight (1090g) design
- 19mm stroke and high traction power for faster riveting action
- Fitted with vacuum integrated system, and spent mandrel catcher to ensure a safer workplace
- Air circuitry system designed to optimise air consumption for environmental savings

AR-021M-RJ/SJ

AR-021H-RJ

AR-021EX

AR-021EXH

ARO21 Series

- Soft-Set® shockless technology offers ergonomically correct action to minimise risk of RSI.
- Ultra Jaws for longer life.
- Noise reducing muffler.
- Heavy duty diecast construction.

ARO21M, SJ & RJ Models - For setting standard rivets 2.4mm - 4.8mm in all materials.

ARO21H-RJ - For setting standard rivets 2.4mm - 6.4mm in all materials.

ARO21EX - For MONOBOLT® T-Rivet and standard blind rivets 4.8-6.4mm in all materials.

ARO21EXH - For Huck MAGNA-LOK® fasteners and other structural blind rivets 6.4mm only.

AR-011-S
To set rivets from
2.4mm to 3.2mm

AR-011-M
To set rivets from
2.4mm to 4.8mm

AR-011-P
Offset head for access to tight clearance
areas. To set rivets from 2.4mm to 4.8mm

ARO11 Series

- Most versatile blind rivet tool.
- Sizes and styles to satisfy any production need.
- Excellent value - dependable and cost effective.

NEW PRODUCT

@R03i

- Riveting capacity 2.4mm to 4.8mm.
- Instantly turn your impact driver into a riveter.
- Compatible with standard hexagonal chucks.
- Possible applications: Automotive repairs, Air-conditioning, DIY projects etc.

@R03i

R1-B1

A high performance, compact riveter, to improve workshop or production line efficiency.

With energy saving and safety features which could make your workplace "cordless"

Made in Japan

- Lightweight at only 19.9kg with an ergonomic, well balanced design to reduce user fatigue
- Supplied with energy efficient 14.4V Li-ion battery
- Packaged with the charger in a moulded plastic carrying case and sets up to 4.8 (3/16") diameter rivets in all materials
- Safety function prevents tool from operating until spent mandrel catcher is properly fitted
- Features LED spotlight to ensure accuracy in all work applications
- Ideal for off-line and outdoor riveting applications where compressed air is not available

Hand Rivet Tools

HR-200

Floating Jawcase Mechanism

- For professional and home use
- Sets rivets up to 4.0mm (5/32")

HR-002D

Floating Jawcase Mechanism

- Overcomes drawbacks of conventional hand riveters by holding the rivet firmly regardless of tool position
- Sets rivets up to 4.8mm (3/16")

HR-003B

Heavy Duty Hand Riveter

- Longer handles and gear mechanism exert greater rivet break power
- Maintenance free construction
- Sets rivets up to 6.4mm (1/4") stainless steel, in all materials including stainless steel

HR-005A

Flexible Hand Riveters

- Versatile design for 360° multidirectional riveting
- 2.4mm to 4.8mm (3/16")
- (4.8mm in Aluminium only)

AN-200A

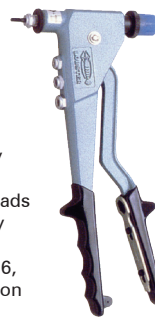

- Lightweight spin-pull rivet nut setter, suitable for production line applications
- For setting standard nut rivets M3-M10 (#4, #6, #8, #10, 1/4", 5/16", 3/8") in all materials.
- For setting any flanged head nut rivets M3-M6 in all materials and M8 (5/16") aluminium only.

HN-010

Heavy Duty Hand Nutters

- Rugged construction
- Simple stroke adjustment (adjuster ring with memory stroke scale)
- Quick-drill mechanism threads and unthreads nut rivets by utilising round knob grip.
- 3 nose assemblies, sizes M6, M8 and M10. M5 available on request.

HND-005

Light Duty Hand Nutters

- Aluminium diecast frame & hardened chrome vanadium steel handle
- 4 nose pieces, sizes M3, M4, M5 & M6.
- Also available in kit form (as illustrated).
